Instruction
Please do these steps as in the following.

1. In this exam, you have to build your own website which follows some requirements below.

By using ASP.NET, create a CRUD (*Create, Read, Update, Delete*) web site. The conditions you must satisfy are:

- There is no minimum number of features and tables in your database.
- You must do all of the CRUD and login, registration, and logout features.

Make a report, the content of the report is the database design (conceptual & physical data model), list of features, screenshot and a brief explanation of your webpage (per feature). Also to maintain fairness for your awarded grade, state clearly in your report, the percentage of works and the contribution(s) for each member in your group, e.g., Mukiyo Jalmo Wono 40% [*state Mukiyo's contribution(s) here*], and Sri Lestari 60% [*state Sri's contribution(s) here*]. Upload your web page to the free web hosting. Then upload your source code to your GitHub repository.

2. To avoid plagiarism/cheating, every member/student of your group needs to pledge and declare, then she/he must submit her/his **signed pledge and declaration** as in the following. Failed to do so will be resulted in getting 0 (zero) grade. Attach the **scanned/photo** of your *declaration* in your report.

"By the name of Allah (God) Almighty, herewith we pledge and truly declare that we have solved quiz 2 by ourselves, didn't do any cheating by any means, didn't do any plagiarism, and didn't accept anybody's help by any means. We are going to accept all of the consequences by any means if it has proven that we have been done any cheating and/or plagiarism."
