Instruction

Please do these steps as in the following.

1. In this exam, you must build your *own website* which follows some requirements below.

Create a CRUD (*Create, Read, Update, Delete*) website by using the Laravel framework (or any framework that suits you the best). Laravel is an MVC (*Model-View-Controller*) **PHP framework**. The conditions you must satisfy are:

- Consists of a minimum of 8 features excluding login, logout, and registration
- Must contain login, register, and logout feature
- Must contain a foreign key in your database

Make a report, the content of the report is the database design (conceptual & physical data model), a list of features, screenshots, and a brief explanation of your webpage (per feature). Also, to maintain fairness for your awarded grade, state clearly in your report, the percentage of work and the contribution(s) for each member in your group, e.g., Dwianti Budi Astuti 55% [*state Dwianti's contribution(s) here*], and Gupito Lelono 45% [*state Gupito's contribution(s) here*]. Upload your web page to the free web hosting. Then upload your *source code* to your GitHub repository.

Our grading will be based on:

- Design [**20 points**]
- Implementation [**50 points**]
- Analysis/evaluation [**25 points**]
- Conclusion [**5 points**]

Total: [**100 points**]

2. To avoid plagiarism/cheating, every member/student of your group needs to pledge and declare, and then she/he must submit her/his **signed pledge and declaration** as in the following. Failing to do so will result in getting a 0 (zero) grade. Attach the **scanned/photo** of your *declaration* to your report.

“By the name of Allah (God) Almighty, herewith I pledge and truly declare that I have solved the midterm exam by myself, didn’t do any cheating by any means, didn’t do any plagiarism, and didn’t accept anybody’s help by any means. I am going to accept all the consequences by any means if it has proven that I have done any cheating and/or plagiarism.”
